

DEMAND RESPONSE PROGRAM

January // 2023

When the demand for power is high, SaskPower relies on this program to help meet the province's electricity needs. If you are eligible to participate, we'll work with you to lower or shift your power use when electrical demand is high and provide compensation.

Eligibility:

- Be a large industrial customer
- Have consistent load characteristics
- Be able to reduce your power by 5 megawatts (MW) from a single location

How to Participate:

- Meet the criteria in the chart below
- Contact your Account Manager to apply
- We'll assess if your operations are suitable for the program

Demand Response Program Details
